- Great presentation!
- Would like new information added – saw most of the presentation before.

- Ok information, but could have been more detailed. Q&A period was better.
- Could hear adjacent presentation. (2x)
- Thanks for the handouts.
- Specific descriptions and requirements of rebate programs would be helpful.
- Presenters read from the slides for much of the session (2x), which made it dull. Q&A was better.
- Actual case study with hard figures would be persuasive, especially for a retrofit.
- Please do not forget that a good tree canopy is vital to every school campus, especially in the Central Valley and Inland Empire. Building structures over parking areas to support PV panels will often be in conflict with this thought and requires additional first cost that pushes the payback further.
- Great program – thanks!
- Information was presented clearly and succinctly.

- Presentations were too long. Also, some presenters recited their slides. Last two presenters ran out of time.
- Written material was not in order.
- This was unquestionable the most inspiring, urgent and important workshop I attended. Excellent presentations by knowledgeable enthusiastic speakers.
- Too much coverage on regulatory and legislative requirements and not enough “case studies” of what systems and projects the district has employed.
- Good emphasis on global implication and practices.
- Great presentation – community colleges folks doing so much more research than K-12. We need to tap this information more. The best information I have seen on renewable energy systems.

Additional Comments:

- It would be great if Maintenance and Operations had an information sharing mechanism.
- Of the three districts represented, 5000 ADA was the smallest – we are 1810 ADA and many of the practices do not apply simply due to the lack of purchasing power. Would like to have “small district” perspective.

- Too much of a sales pitch/not enough of a learning environment.
- This workshop was very informative.
- Sustainable master planning is relevant – but presenters didn't show relationship.

Additional Comments:

- We need to keep up with the progress of BIM every year.
- Too many excuse about what is not “yet” working in the BIM/IPD world vs. the advertisement of “proof positive” that the answer is “yes on both counts.” Good discussion, but be honest about what will be covered.
- Good clinic.
- Move to earlier in conference for better attendance.
- Two hour format is excellent. It allowed for good conversation/discussion.
- Good job.
