Under the leadership of past CASH Chair Terry Bradley, the CASH Maintenance Network was founded in 1996 to strengthen maintenance efforts statewide and to increase public and legislative awareness and funding for school maintenance issues.

The CASH Maintenance Network is comprised of maintenance department personnel and affiliates throughout the state.

Accomplishments

- As maintenance departments face new legislation in areas of integrated pest management, toxic mold, storm water management and indoor air quality, the CASH Maintenance Network has fought successfully to ensure new statewide requirements do not create undue hardships for maintenance departments.

- Worked successfully on behalf of maintenance departments as the Legislature implemented the requirements of the Williams settlement.

- Conducted workshops and provided special updates to assist maintenance departments with meeting the requirements of the inspections required under the Williams settlement.

- Successfully fought the passage of SB 409 and SB 1035 which, if enacted, would have resulted in significantly less funding for maintenance departments.

Sponsorship Opportunities

Regional Workshops Networking Breakfasts
- (Three sponsorships per location)

Maintenance Network Website
- (Two sponsorships available annually)

CASH Annual Conference
- Maintenance Network Breakfast
- Maintenance Network Reception
- M&O Fair

Who We Are:
The CASH Maintenance Network (CMN) focuses exclusively on school maintenance and operations issues in order to enhance teaching and learning in California’s schools. We advocate for Maintenance & Operations resources and work to develop reliable practices to maintain our schools.

What We Do:
- Increase public awareness of the connection between well-maintained schools and student performance.
- Provide advocacy to support school M&O funding and programs through legislation and the State Budget.
- Offer guidance and training so school M&O Departments can meet the Local Control Accountability Plan’s (LCAP) “Good Repair” standard.
- Convened the CASH Facilities Inspection Tool (FIT) Guidebook 2.0 Update Subcommittee to create a revised CASH FIT Guidebook to assist school M&O departments to identify and address immediate and ongoing threats to health and safety.

Benefits:
School M&O departments face significant challenges with the reduction of dedicated state funding for school M&O, and the Local Control Accountability Plan’s (LCAP) requirement that districts must ensure their facilities are maintained in “Good Repair”.

The CASH Maintenance Network focuses on providing legislative advocacy, timely information and training to our members to ensure school M&O departments can effectively maintain their schools to support teaching and learning.

Maintenance Network Listserv
Do you have a question regarding maintenance, or want to hear about industry best practices? The Maintenance Network Listserv allows you to send an email to all Maintenance Network members.

Upcoming Events
Attend Maintenance Network Workshops & Events at a discounted rate. Maintenance Network membership covers everyone in your organization.
